

## CSS Homework #2

1. Create an HTML file named: *YournameWeb5.html*
2. Type this code:

```
<!DOCTYPE html>
<html>

<head>
<title>Web Page Five</title>

<style>

</style>
</head>

<body>

</body>
</html>
```

3. Use the text commands to change the color, alignment, decoration, transformation, or indentation.
  - a. In the heading, make an h1 style and an h2 style. You can make other heading levels if you want. Each heading should have a different style.
  - b. In the heading, make a p.upper style with a 10 px indentation and transform all the letters to uppercase.
  - c. In the heading, make a p.lower style with a 20px indentation and transform all the letters to lowercase.
  - d. In the body section of your page, copy and paste this:

```
<h1>This is my impressive heading font</h1>
<h2>Followed by my incredible subheading font</h2>
<p class="upper">The quick brown fox jumps over the lazy dog.</p>
<p class="lower">The quick brown fox jumps over the lazy dog.</p>
```

4. Use the font commands to change the font family, style, size, weight, or small caps of some text. Add whatever text you want to your webpage.
5. In your style section, refer to the Font Awesome, Bootstrap, or Google stylesheet and then insert 5 icons on your webpage.
6. Save your webpage. Show me your webpage in class.
