

HTML Homework #1

1. Create an HTML file named: *YournameWeb1.html*
2. Include the document type tag.
3. Include the start html tag at the beginning and the end html tag at the end.
4. Create a header. Your header must have start and end head tags. In your header include a title of your webpage. Call it “My New Web Page”.
5. Create the body of your page with start and end tags. Make the background color of your page Bisque, Khaki, or SpringGreen.
6. Make an h1 heading with blue text. It should say “The Big Heading”.
7. Make an h3 heading. It should say “The First Smaller Heading”.
8. Create a paragraph of text under the heading. Make one or several words in your paragraph bold.
9. After your paragraph, make a link to www.trinitytutor.com.
10. Insert a horizontal line after the paragraph.
11. Make an h3 heading. It should say “The Second Smaller Heading”.
12. Create a paragraph of text under the heading. Make one or several words in your paragraph italicized.
13. Insert a break after the paragraph.
14. Make a paragraph with centered text. The paragraph should just be your first and last name.
15. Save your project. Show it to me at the next class.
