

## 3.5 Homework

---

On your own paper, write the answers.

1. Draw a shape that is a 5-sided polygon.
2. Draw a shape that has 5-sides, but is not a polygon.
3. Find the sum of the interior angles and the sum of the exterior angles of a polygon that has:
  - a. 9 sides
  - b. 12 sides
  - c. 18 sides

Solve for  $x$ . Write an equation. Show all the steps for solving.

6. A regular polygon has equal sides and equal angles. Find the measure of one interior angle and one exterior angle for each polygon listed.
  - a. Pentagon
  - b. Decagon
  - c. 20-gon
