

# Transformations

Original graph:  $y = f(x)$

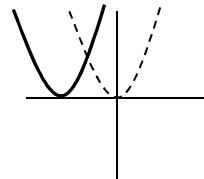

Vertical shift  $c$  units **up**:  $y = f(x) + c$

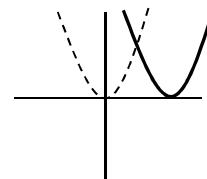

Vertical shift  $c$  units **down**:  $y = f(x) - c$

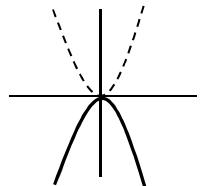

Horizontal shift  $c$  units to the **left**:  $y = f(x+c)$

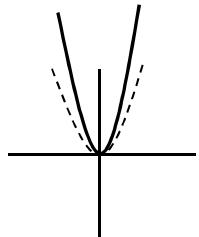

Horizontal shift  $c$  units to the **right**:  $y = f(x-c)$

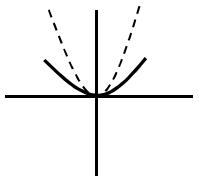

Reflection about the **x-axis**:  $y = -f(x)$

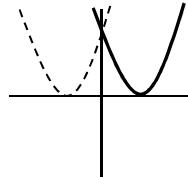

Vertical stretch:  $y = c f(x)$

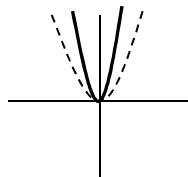

Vertical compression:  $y = \frac{1}{c} f(x)$

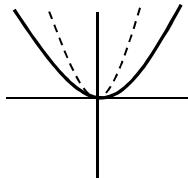

Reflection about the **y-axis**:  $y = f(-x)$

Horizontal compression:  $y = f(c x)$

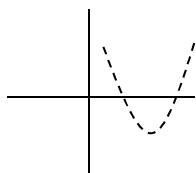

Horizontal stretch:  $y = f(\frac{1}{c} x)$

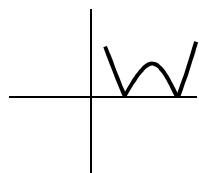

Absolute value:  $y = |f(x)|$

Before:

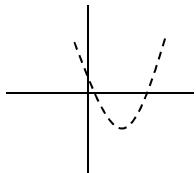

After:

Absolute value:  $y = f(|x|)$
