

Module 3 Test Review

Terms to Know

- Element
- Compound
- Decomposed
- Ionic
- Covalent
- Subscript

Know the properties of a metal

Know the properties of a nonmetal

Name the metalloids

Know the four assumptions of Dalton's atomic theory

Understand the Law of Mass Conservation

Be able to calculate quantities for a decomposition reaction

Be able to determine the number of atoms in a molecule

Be able to determine if a compound is ionic or covalent

Name ionic and covalent molecules

Lab equipment names

Lab safety rules

Honors:

Know which elements are solids, liquids, gasses at room temperature.

Know at least two properties of two different elements
